

S3 Static Website Deployment

Website Files Stored in the S3 Bucket

aws [Search] [Alt+S] [United States (N. Virginia)] Account ID: /26863...

Amazon S3 > Buckets > demo-web-s3-om

demo-web-s3-om Info

Objects Metadata Properties Permissions Metrics Management File systems Access Points

Objects (4) [Refresh] [Copy S3 URI] [Copy URL] [Download] [Open] [Delete] [Actions] [Create folder] [Upload]

Objects are the fundamental entities stored in Amazon S3. You can use [Amazon S3 inventory](#) to get a list of all objects in your bucket. For others to access your objects, you'll need to explicitly grant them permissions. [Learn more](#)

S3 Bucket Public Access and Bucket Policy

aws [Search] [Alt+S] [United States (N. Virginia)] Account ID: /26863...

Amazon S3 > Buckets > demo-web-s3-om

Public access is granted to buckets and objects through access control (ACLs), bucket policies, access point policies, or all. In order to ensure that public access to all your S3 buckets and objects is blocked, turn on Block all public access. These settings apply only to this bucket and its access points. AWS recommends that you turn on Block all public access, but before applying any of these settings, ensure that your applications will work correctly without public access. If you require some level of public access to your buckets or objects within, you can customize the individual settings below to suit your specific storage use cases. [Learn more](#)

Block all public access
Off

Individual Block Public Access settings for this bucket

Bucket policy

The bucket policy, written in JSON, provides access to the objects stored in the bucket. Bucket policies don't apply to objects owned by other accounts. [Learn more](#)
